## PROJECTS

### Students Information in Statistics

Project Objective:

- Analyzed a dataset containing detailed attributes of students to derive statistical insights.

Statistical Insights:

- Generated actionable insights from comprehensive analysis of student data.

### E - Tickets for Stadiums

Project Overview:

- Developed a digital ticketing system for stadiums to streamline event access.

- Enabled users to purchase electronic tickets through a mobile app and online platform.

User-Centric Design:

- Created an intuitive interface for users to store and present tickets.

- Emphasized user convenience with easy access to ticket management features.

### Online Food Delivery Application

Professional Summary of Technical Expertise:

- Developed an online food delivery application, enhancing customer experience through streamlined ordering and delivery processes.

- Implemented user-friendly interfaces that enable customers to order food efficiently via mobile applications.

- Integrated secure payment systems, ensuring safe transactions and boosting customer trust.

- Leveraged analytics tools to monitor usage patterns, informing strategic improvements to the app's functionality.
